Historian and author David Hackett Fisher recently completed a biography of Samuel de Champlain, to coincide with the 400th anniversary of Champlain's explorations in New France (Quebec) and New England. In his book, Hackett-Fisher described Champlain's arguments that a leader must be "prevoyant" – a word that has no exact equivalent in modern English. Hackett-Fisher writes:

*Champlain's idea of prevoyance was different from foresight in its common meaning. It is not a power to foresee the future. To the contrary, prevoyance was the ability to prepare for the unexpected in a world of danger and uncertainty. It was about learning to make sound judgments on the basis of imperfect knowledge. **Mainly it is about taking a broad view in projects of large purpose, and about thinking for the long run.***
