Greetings from the Friends of Northern Lake Champlain! You are receiving this email because FNLC is planning an Advisory Council Meeting on November 12th at Jay Peak Resort from 9:30am – 11:30am followed by a green infrastructure storm water tour of Jay Peak (11:30am – 1:00pm), highlighting the extensive storm water management that Jay Peak has implemented.

I am the new chair of the Advisory Council and with the forthcoming revisions to the TMDL and a renewed focus on finding solutions for Lake Champlain's pollution problems, FNLC is eager to bring together solution oriented organizations and people to inform and prioritize our efforts in our shared watershed.

Please SAVE THE DATE. A full itinerary and agenda will follow in the next week. Please let me know if you are unable to attend this important meeting on water quality initiatives that will affect our Lake now and in future years.

Kind regards,

Julie
